Welcome

to our American Science & Surplus catalog. Here you will find a unique mix of industrial, military and educational items, with an emphasis on science and education. We supply a wide range of unusual and hard-to-find items (some say bizarre stuff) to the hobbyist, tinkerer, artist, experimenter, home educator, do-it-yourselfer, and bargain hunter. Our items are great gifts, inexpensive supplies, and an endless reason for a giggle or a "Gee whiz!" We try to be scrupulously honest in presenting whatever we know about what we have, and always take it back, no questions asked, if the customer isn't satisfied with it. Please remember that we offer many more items than will fit on these pages. You can both peruse and purchase every item we have at our website: www.sciplus.com. Thank you for taking the time to browse our catalog. We appreciate your business.

Frequently Asked Questions

What is surplus?

We buy closeouts, inventory overruns, mis-manufactures, and items whose time has not come. We can usually acquire these items on a one-time-only basis. When a surplus item is gone, it is gone. So if you see something you love, best get it now since we may not have it tomorrow. Our website is frequently updated with our inventory. If you see an item in our catalog, but cannot find it online, it means we have sold out of that item. If our stock of the item you have ordered is exhausted we will refund that portion of your remittance. When we can't find surplus, we may carry regular merchandise which we think those interested in learning and tinkering will find appealing, but only if we feel it is good quality at a fair price.

Can I return items?

Yes. We accept all returns without question and will either refund your purchase price or send you a replacement, as you chose. Returns must be made within 30 days of purchase. For complete details, please check the order form bound in the center of this catalog.

What forms of payment do you accept?

We accept Visa, MasterCard, Discover, American Express, checks and money orders. We are sorry to report that we cannot accept CODs, cash, stamps or gold. **If paying by check, please be aware that you are authorizing American Science & Surplus to use the information on your check to make a one-time electronic debit to your checking account. This electronic debit will be for the amount indicated on your check. If you do not have sufficient funds in your account, a returned check fee may be debited from your account. If you have any questions, or choose not to have your check converted into an electronic item, please contact American Science & Surplus at (888) 724-7587.**

Do you have a minimum order requirement?

We regret that the costs of doing business preclude us from processing orders of less than \$10.00 merchandise value (exclusive of shipping and handling). We will return orders of less than \$10.00 merchandise value.

Additional information can be found on the order form bound in the middle of this catalog.

Unicorn #2

Yes, we mean that #2. For some reason, all of a sudden, we didn't want to write the word poop. This non-toxic liquid slime comes in a wavy triangular-ish plastic flask and is called Unicorn Poop, and we give it two horns up. Flask is about 4" x 3" with a fun label and a purple cap. This is good slime, friends, more gloopy than liquidity, and with a nice, metallic glitteriness.

A Real Head-Scratcher

Not a mystery, but an actual way to scratch your skull. Looks like a \$29.95 neo-whisk from Grate & Borrow, but it's really our all-time favorite stainless steel scalp massager. (Also a mid-century modern metal sculpture if you stand it up on the coffee table, where it's handy for cranio-itchy moments anyway.) Rocket-shaped handle leads to a dozen spring tines with little bubble ends. Measures 9-1/2" long overall.

45036 Tingly Head-Massager \$4.50/each

Cats, Not The Musical

These hard rubbery plastic kitties are in cleaning-themselves action poses, which might be adorbos or might be kind of weird depending on your mindset. We have (3) different poses and colors, and we'll send you (1) that you'll love because you obviously love cats. The gray one is licking its paw. The black one with white paws is trying to lick its tail, and the orange one with stripes is trying to lick its belly, and who among us hasn't tried to do that? Each cat measures approx 2-1/4" long.

Martial arts—the final frontier. You've done it all (or most of it). Now, learn the ancient art of Kung Fu from Captain James T. Kirk in the Star Trek™ Kirk Fu Manual. This 7-1/4" x 7-1/4" hard-cover book from Insight Editions highlights all of Kirk's legendary moves across (63) full-color pages, most of them illustrated. Rattlesnake Egg Magnets

Or singing suppositories. The pair is very magnetic, whatever they are. The 1-3/4" long prolate spheroids look like highly polished black hematites. Hold them an inch apart in your palm, toss 'em into the air and listen to them make a sound like the cyber-crickets. Or an electrocuted chicken. The manufacturer suggests keeping these mega-magnets away from computers, pacemakers, TV sets and credit cards.

Tiny Laser Guns

When someone asks you to bring out the big guns, leave these in the drawer. Called the World's Smallest Laser Guns, these (2) space blaster-looking guns have white bodies and either blue or red highlights. They measure a petit 3-1/2" long x 2" tall x 1/2" wide—probably not big enough to take over a galaxy. The look? Not quite Buck Rogers or Star Wars, but definitely cool. Pull the trigger and one of (8) different sounds will play while the LED lights up and flashes along. Ages 4+. **! WARNING: CHOKING HAZARD—Small Parts. Not for children under 3 yrs.**

Original Slinky

Does anyone need to be told what a Slinky® toy is?? Okay, it is a very slack spring, 2-7/8" dia x 2-1/2" long, compressed. It will stretch out to about 5 or 6 feet long without deforming. That's the boring part. The interesting part is that it "follows" itself. Slosh it from hand to hand. Put in on the top step of stairs, flip the end down a step, and watch it walk down stairs, or down an incline. Believe us, no childhood (or adulthood) is complete without an original steel Slinky®. It was hard for us to find it, but we are glad we did. You should be too.

Play The Piston Flute

Or the Swanee whistle. Whatever you call it, this little slide whistle has an outsized musical history. No elevator has ever fallen in a cartoon without it, and without one, no jug band is complete, but Louis Armstrong also played one, and Ravel even required one in an opera. In assorted plastic colors with a steel slide, 6-7/8" long x 1/2" dia.

93011 Slide Whistle \$4.25/each

Shaped Like A Butterfly...

Muhammad Ali would have loved this (575)-piece jigsaw puzzle, except that it doesn't sting like a bee. Actually, it doesn't float like a butterfly, either, but it's definitely shaped like one. It's not some boring square. Makes a beautiful 20" x 23" butterfly shape when completed, and it's covered in more than (70) colorful images of butterflies. Ages 8+. ! Get More Out Of Your Jigsaw

Sometimes a regular jigsaw puzzle isn't enough. That's when you turn to these 2-in-1, double-sided Jigsaw Puzzles with blank sudoku and word puzzle patterns on (1) side and completed patterns on the other. Solve the puzzles on both sides of the enclosed sheets, then use the sheets as your guide to assemble the jigsaw, also using the pre-printed sides of the jigsaws themselves. We know—it's like looking into a mirror facing a mirror. Your brain will thank you. Approx (250) pieces. For ages 6-9, but why not adults? We're older than 9 and we love ours. ! 24-Karat Aces & Eights

Still a dead-man's hand, but much flashier if you're holding these gold-foil playing cards. In a standard playing card size, they shuffle smoothly, have Ben Franklin's image from the hundred-dollar bill on the back, and look like a million bucks, although we haven't done the math. Shut up and deal. They even have a certificate of authenticity that says they actually have Gold Foil in them.

97364 24K Playing Cards \$5.95/each

Classic Yet Modern Puzzles

These (3) assorted, wooden 3D geometric puzzles are sort of throwback, being that they remind us of how we used to pass the time on road trips before computers took over the world (our computer told us to say that). But they're modern, too, with intricate designs and bright colors. Puzzles measure approx 3" x 3" x 3" each and differ in difficulty, with ratings on each box. Designs range from 3D X's, to interlocking squared posts to something that looks like a 3D asterisk. Our samples were green, yellow and a delightful fuchsia. The goal is to disassemble them. Then put them back together. Don't puzzle-solve and drive.

50540 3D Wooden Puzzles \$4.95/each

Don't Eat This Puzzle

It's a-pizza time with this a-pizza puzzle from Goliath, and as much as we want to take a bite out of it, we're just not a-going to do it. But boy-ol'-boy, it looks appetizing with its salami, tomatoes, mushrooms, black olives and other toppings. Abbondanza! Tony Danza! Includes (300) pieces, and when it's finished it'll measure 19-1/2" x 14-1/2". Plus, the recipe—for both the crust and toppings, is on the back. That one, you CAN eat. ! In Honor Of Antikythera

Beyond Rubik's cube, this complex wooden puzzle is inspired by the Antikythera Mechanism, a mysterious astronomical device discovered off the coast of the eponymous Greek island in 1901 and sometimes called the first analog computer. The object is to have the resulting (12) columns all add up to 42. Difficulty level is five stars. Also, really pretty. Ages 14+. ! WARNING: CHOKING HAZARD—Small Parts. Not for children under 3 yrs.

It's Cribbage, Not Cabbage

You know what that means? This game doesn't stink! And that's why it's so great for traveling, along with the fact that the included instructions, deck of cards and folding wooden score board with metal pegs fit easily into your pocket. For 2 players. Great for airplanes, automobiles, campers, choo-choos and cruise ships. For ages 4+. ! WARNING: CHOKING HAZARD—Small Parts. Not for children under 3 yrs.

Underpants In A Can!

Emergency underpants in a can. Says it all, doesn't it? Quite stretchable in a Tyvekish white fabric, "one pair fits most adults." They're hip-hugger, semi-bikini, translucent type drawers, so despite the smiling man wearing them and a red bow-tie on the can, some (insecure) guys might find these just a touch jeune fille-ish. "Safe, Sanitary, Secure." Says so right on the 3" x 1-1/2" x 2/3" flip-top metal can.

94417 Canned Underpants \$4.95 / each

Dominoes, On The Go

Say yes to these dominoes. You may need a magnifying glass to read the instructions on the back of the wooden box, but the bones themselves, the actual dominoes, are as easy to read as a large-print novel. Box measures 6-1/2" x 2-1/4" x 1-1/2", in a nice brown stain with a colorful old-timey logo on the sliding top. Don't get caught somewhere without your bones. For ages 4+. ! WARNING: CHOKING HAZARD—Small Parts. Not for children under 3 yrs.

Duck!

Spin the ribbed 7" handle of this hand-powered prop between your palms, and watch it take off. (If it lands instead of flying off into the wild blue yonder, reverse the spin!) Neon handle, bright, metallic-flaked 8" propeller, and a lift so high we imprinted it with our logo - the airborne Jarvis. It's all plastic, and won't decapitate anyone, but it's still for 10-year-olds and up.

Remember Memory?

We had something really clever to say about this Memory Maze electronic brain teaser, but in all the commotion, we forgot. To keep our memory sharp, we should probably do more brain teaser exercises, like this 2-1/2" x 2-1/2" Memory Maze, which is kind of simon-like, and fits easily in our pocket. Oh wait, now we remember what we were going to say—this Memory Maze is awesome! Ages 5+. ! WARNING: CHOKING HAZARD—Small Parts. Not for children under 3 yrs.

98004 Memory Maze Game \$7.25 / each

Flying Bird

From France comes this fun mechanical plastic bird that really flies by flapping its wings. It is about 8" long and has a wingspan of 16" tip to tip. Snap the wings in place, wind up the rubberband drive and toss it gently into the air on its maiden flight. It flies up to fifty yards with a satisfying fluttering sound.

88566 Flying Bird Toy \$14.75 / each

Smart Enough To Open It?

Want to prove how smart you are or go batty trying? We're still going batty trying. Join us—it's fun! We'll send you (1) of our (4) wooden Mysterious Puzzle Boxes, 6" x 2" x 2-5/8," rated as either "challenging" or "impossible" to open by the manufacturer. Each is stained a different color and includes instructions (solutions) to open (4) different kinds of boxes. All have slots in the sides to insert money, coins or other small things. We're working on the "impossible" difficulty version at the moment, and we have to say, it's accurately rated so far. This could take up hours of a kid's (or adult's) day, and it's better than watching TV. Good luck. We have to get back to our puzzle box. Ages 6+.

You Can't Eat These Gyros

We love when science and play come together, and this precision gyroscope is our latest obsession in that department. Constructed mainly out of durable plastic with rubberized tips, this gyroscope was designed specifically for play, yet its high-performance movement, and near-silent operation, might make you think it was meant to do the actual work of a gyroscope, namely to measure or maintain orientation and angular velocity. Nope, it's just for fun and wonder. We'll pick a nice color for you (green, white, or milky off-white that glows in the dark), and it'll include a ripcord, trick pedestal and tips/instructions sheet. Made in the USA. ! WARNING: CHOKING HAZARD—Small Parts. Not for children under 3 yrs.

Look Sharp, Not Flat

Lots of people had piano keyboard neckties in the '80s, but no one could play them--not even the piano players! That's because they weren't actual musical instruments. Can you imagine a time like that? Thankfully, those days are long gone. Our piano tie is a working keyboard with (8) different electronic notes that you can play through the tiny speaker hidden in the knot. Polyester and 16-1/2" long, the tie has a quick-release for easy attachment and removal. Also has an on-off switch, for when you decide you're done playing for the night. Runs on button cell batteries (included).

Hold the Sour Cream!

We regularly have the "taco vs. burrito" argument—uh, discussion—here at the office, usually around noon. Suffice to say, opinions differ. But everyone agrees on how great this all-ages Taco vs. Burrito Card Game is. The world agrees, too, since it's currently ranked #269 on the list of every single toy the online amazonians sell, and 23K reviews can't be wrong. Right? They sell it for 18 bucks, but look at our price. The game is satisfyingly strategic, with Action Cards that send it in a new direction. Takes only minutes to learn and 15 minutes for 2-4 players to play. Best part? It was invented by a 7-year-old, and crowd-sourced! We wanted to play it once just based on that, but now we can't stop. Ages 6+.

Dandiest Donut in the Domain

Donut magnet you can take to town!! 74mm dia x 14mm thick with a 30mm hole. Very strong and well pedigreed - in fact, its kin are activating pacemakers. They are of a high permeability ferrite material with a lovely light blue or white epoxy coating. Okay, we have them because there is the odd bubble or scratch in the coating which ruled them out of the medical ball, but they're fine company nonetheless. Good display bases, paper clip traps, and super for classroom demos.

2823 Coated Donut Magnet \$3.95/each

Plain Donuts

Can't beat a classic. These uncoated ceramic donut magnets have a 1-lb pull, which makes them dandy for classroom or refrigerator use. They measure 1-1/4" dia x 3/8" ID x 3/16" thick and are polarized on the faces. You get a wrapped roll of 29 donuts.

Excellent Electromagnet

Physics project alert! This robust puppy of a magnet has dual 6V coils and stands 4" high x 3-1/4" wide, not counting the side terminals. Each coil draws 2.4A at 6VDC, and is conservatively rated for 40 Newtons (approx 9 lbs) at that voltage. Can be wired in either parallel or series, and comes with a mounting hook. Works great with a 6-volt lantern battery.

Ceramic Power

Ceramic magnets can be quite powerful and have excellent resistance to demagnetization. These rectangular ones are no exception. Add the power of surplus and we'll give you these mighty-mites for bargain prices. This 3-lb-pull guy is 1-7/8" x 7/8" x 3/8" thick, for mounting bigger pix, we figure.

The Magnet Of Death

One of our coolest recent magnet acquisitions. You're welcome. This one is coated white and in the general shape of a tombstone with a flat bottom, straight sides and a rounded top. We're Talking A Lot Of Pull

Just off the truck (after we all got together and finally pried them free), these rare earth Neodymium Iron Boron (Ndefeb) block magnets have more pull than your mayor. Shaped like a rectangle, they measure approx 1/2" on each side and 1" long, with about 40 lbs of pull. Strong! Coated in a triple layer of nickel-copper-nickel for maximum durability and protection. ISO Certified. Br max:14,500 Gauss.

93515 Neo. Keyring Magnet \$9.25/each

A Real Rod Magnet

Our old buddy Rod was quite the magnet—mostly for trouble and Johnny Law—so we can't help feeling nostalgic as we grip this 4" x 3/8" alnico rod magnet. Because of their temperature stability and relatively high magnetic strength, alnico magnets are often used in industry for applications involving rotating machinery, meters and instruments—stuff that would have bored Rod out of his head but is important, nonetheless.

50436 Alnico Rod Magnet \$8.50/each

Hooked On Magnets

Forget about phonics, we're hooked on magnets, at least this kind, which pairs a small, powerful magnet in a focusing cup with a strong metal hook for hanging pictures, calendars, dried fish—you name it—from any metallic surface. This round magnet is 1" dia and the whole mount—magnet and attached hook—is about 2-1/2" long. We estimate approx. 20+ lbs pull, it picked-up up our 18.5lb office scale without straining. Kicks your best fridge magnet's butt!

Sticky Bar Of Silver

This plated N45 neodymium magnet is shaped like a miniature silver ingot, measuring 1-1/2" long x 1/2" wide x 1/8" thick. Has a big hangonability quotient, which the manufacturer claims is 15 lbs of pull, meaning it's probably closer to 13 lbs. Impressive either way.

95659 Neo. Bar Magnet \$4.85 / each

Nickel-Coated, Quarter-Sized

Nice rare-earth neodymium disk magnet, 1" dia, about the same as a quarter but over twice as thick at 4mm. Rare-earth magnets are permanent and powerful, and this one has approx 7 lbs pull, and always will. Comes with a galvanized metal keeper approx 2" dia so you don't lose it.

93798 1 Inch Disk Magnet \$4.35 / each

Rare Find!

Rare earth magnets are usually killers for their size, and these thick nickel neodymium discs are no exception. The price, on the other hand, for (3) 7/16" dia x 1/4" 5-lb lift or (2) 9/16" dia x 3/16" 8-lb lift magnets each stored on a 2" dia steel disc, is a rare exception.

Mighty Pretty & Mighty Powerful

Like Wonder Woman, this nickel-plated rare earth magnet is pretty and extremely powerful. It's a 3/4" square x 1/4" thick neodymium magnet with an 8-lb pull and a better-than-usual plating job.

Neodymium Column

We're liking this little plated N45 neodymium magnet because it will stand on end and stick out very prettily on the ice box. Measures 1" tall x 1/4" square with a hefty, for its size, 3-1/2 lb pull, 13,800 gauss. (Will also lie down on its side, of course, because everybody does.)

Rock The Poles!

We just want to celebrate...this magnet. (Classic rock fans, you're welcome for the references.) This Alnico cylinder magnet measures 9/16" x 11/16" with a 5/16" x 3/8" slotted hole (we think that's what it's called) in the center. It's a strong buggar at 10 lbs lifting power in the ends, and very shiny silver. Hole makes it great for attaching string to it and retrieving keys lost down the sewer or well. You know, when you lose your keys that way. Made in the USA. You'll get (1) hyper strong magnet per order.

Mystery Magnet

Beats us, frankly, but this black plastic cover, 1-3/4" x 1-1/2" x 1/4" (not unlike a tiny toilet seat cover) is hiding a really nice 1" dia x 1/8" (think: quarter size) plated neodymium magnet, with at least a 5-lb pull, inside. The mystery is that the cover won't open unless you break it. The magnet grabs fine in the case or out of it (and frankly, it makes it easier to take off a surface). Or, tap it on its side with a hammer to crack open the case and reveal nothing but magnet. Just Watch your fingers, please.

Mounting Animal Magnetism

You hear that? Like a deeply satisfying metallic clink? That's the sound of a powerful round mounting magnet in a focusing cup with a hole in the center uniting with the metal surface of your choice. The magnet is 1-1/4" dia x 1/4" thick and the hole is about 1/8" dia. We estimate 25+lbs pull based on the face our owner made trying to pull it off his file cabinet. Slide hooks or other hardware through for a powerful mount, which, let's be honest, is what we all want!!

Butterfly Cage

Hey, there are two words that will never sound right together—butterfly cage. Yet if you are going to be a good friend to butterflies, and gently admire their beauty, you can't do it without a cage. Let's call it an enclosure, shall we? This one, made of white mesh with green trim, measures 13" tall x 11-1/2" dia. Looks like an oil barrel when it's popped up, and stores basically flat. The lid's on top, with a zipper around the circumference. The (2) loops on top allow you to hang the cage so you can admire your temporary pet butterflies while standing, and they can get a better view of the world, too. And then it'll be easier to set them free and go look for some new ones. Butterfly hotel. There—that sounds even better.

But genuine faux fur, not your ersatz faux fur. This acrylic pillbox hat is just like the ones Audrey Hepburn wore, but really fuzzy. Drinking Bird

You're buying the drinks and this wacky, yet debonair, bird with a top hat and plastic base (7" tall OA) can't get his fill of water. Get him started, and he dips his beak into your glass repeatedly. How? Fluid inside his glass body condenses from the evaporative cooling of the water off the bird's beak, making it top heavy and dunking it back into the water. The condensate rejoins the liquid pool in the bird's bulb, and he tips up again. Process continues indefinitely. **WARNING!** The fluid and dye inside the bird can permanently stain, and the bird's glass body can easily be broken. Manufacturer warning states this item is not intended for children 8 and under. **WARNING: CHOKING HAZARD-Small Parts.** Not for children under 3 yrs.

Radiometer

Another oldie but goodie. 5" high evacuated clear glass stand 3" in diameter at the top. A four bladed vane is balanced on a needle inside the sphere. Because opposite surfaces of the vanes are black and white, incident radiant energy is absorbed or reflected to a different degree. The result is a spinning vane. The brighter the light, the faster it spins. Simple, but compelling. Brief explanatory instruction sheet included.

A Storm's A Comin'

Admiral Fitzroy used a device like this to determine weather changes aboard the HMS Beagle on Charles Darwin's expedition. This, of course, is why it's known as Fitzroy's Storm Glass. It's believed that the different crystal formations inside the approx 11" tall x 1-1/2" dia glass tube with a 2-1/4" base indicate weather changes. Must be placed on an interior wall not subject to sudden temperature changes, sunlight or air from vents and may need to be tested in multiple locations. Follow the instructions carefully and give it about a week to stabilize. It goes without saying, but this is not a toy. It has flammable liquid inside, so no rough-housing near the Storm Glass!

Oh, Boy

In 1958, Buddy Holly came out of radios like these. This retro version of the first transistor radios measures 4-1/4" x 2-1/2" x 1" in dark blue with a wire handle that doubles as an antenna. AM works better than the FM, but who listened to FM in 1958? Plenty loud (guaranteed to not fade away) with classic thumb-wheel tuning and volume. You add a pair of "AAA" batteries. To make things even more like 1958, carry the radio in your shirt pocket.

It's the Hollywood Selfie Pole Monopod, and the name alone is making us go all soft in the middle. Starts out 8-1/2" long and extends to a very sturdy 39" with a camera thread at the end to hold the cell-phone holder. The handle was meant to recharge with USB cord and connect to your phone with Bluetooth, however we've found that the non-replaceable batteries are mostly non-working or only hold a charge for a few minutes. Sold for the robust stick itself because your arms aren't long enough.

For Walls, Not Skies

Don't use these super-cool FAA aeronautical charts to navigate the skies, because they're expired. Not long ago they were used for training and flight simulators. We have an assortment of random U.S. charts, and we'll send you a great one. They measure approx 58" x 20" but will vary depending on the area of the country they depict. Each is double-sided, color-coded and folded. We repeat: The charts are expired! Not to be used for actual aviation! Know what they're great for, though? Replacing your old Hendrix posters and beer signs, and telling the world you're a sophisticated adult with refined tastes. Since aviation charts expire every 56 days, like the yogurt in our fridge, we're going to keep getting new ones. So keep ordering. Great for techies, travelers and as the coolest wrapping paper anyone's ever seen.

I Will Survive...

You will survive, too, just like Gloria Gaynor, and in the woods, even. But only if you have this U.S. Army manual, cleverly titled: SURVIVAL, Department of the Army Field Manual FM21-76. It's 287 heavily illustrated pages of techniques for staying alive (insert BeeGees joke) including orientation; food & cooking; fire- and shelter-making; rafts; animal, insect and plant recognition; and much more. This is the 1970 edition, but staying alive in the woods hasn't changed a whole lot since then. In soft-cover.

You get a 10-foot x 5-foot net made of 3/4" squares individually knotted from twisted cotton/nylon, so the net won't unravel if torn. Might have a slightly musty aroma (but definitely not fishy) that a little sunshine time will fix. Great for maritime-theme decoration, or, we suppose, fishing. And perfect if you want to go to a costume party as Poseidon.

Lazy Scott Bearings

Never seemed fair to nail the "lazy" tag so permanently on the "Susans" but that probably has no "bearing" on the issue. Also called turntable bearings, they are the square, flat ball bearing devices YOU bolt between two flat objects to achieve rotation. Like that spinning center section of a Chinese restaurant table. We had these in surplus once and they were quite popular. To our chagrin, we discovered they could be bought commercially for the same price. So we did. Might As Well Be Magic

Yes, there's a scientific explanation, but we prefer to think this magnetizing/demagnetizing tool relies on magic. Stick a screwdriver head in the bottom, it's magnetized. Stick it in the top, it's demagnetized. Fun for the whole family. Measures 2" square x 1-1/4" with stair-step ports for blades of different sizes. Never drop a screw again.
